

School Reach Message 3/25/2020

Parents,

First, I want to begin by saying thank you for supporting your child's learning during the shutdown. Also, for your convenience, during the shutdown you can find the school reach messages posted on the district webpage under District Announcements.

Secondly, the teachers have been working to provide additional learning opportunities during the extended shutdown. There will be another distribution of packets for those students who do not have access to the internet. If you do have internet access, all of the activities for the junior high and high school students can be found online using the student's Google Classroom. Junior high and high school students need to check their email for the notification that activities have been posted by their teachers in Google Classroom.

The grade school students' activities will be posted on the district page this coming Monday, March 30th. These can be found under At Home Learning on the left hand side of the district webpage. From here you can click on the grade level to view the week's worth of activities.

For families that have shared with their teacher that you don't have internet, paper copies will be made available. The pickup time for these same activities will be next Monday, March 30th, from 8:30-11:30 at each building.

I am asked how long the shutdown will last. I don't have an answer for that but what I can say is that our staff will continue to provide engaging and creative ways to continue to encourage your child to learn during the time that we are shut down.

Thank you for supporting your child's learning,

Donna Veile
